PHANTOM Miro[®] C321 Airborne

AIRBORNE
HIGH-SPEED CAMERA

Tested to Aerospace Specs
1,480 fps at full HD (1920 x 1080) resolution
Operates to -55°C

FEATURES & BENEFITS

DESIGNED SPECIFICALLY FOR AIRBORNE APPLICATIONS

- The C321 Airborne camera leverages the rugged and proven design of the C321 vehicle crash test camera, with additional testing to stringent Aerospace specifications.
- The C321 Air is temperature tested to -55°C and all PC boards are conformal coated, providing high quality HD images in the most demanding environments.
- Use secured, removeable Flash to keep data safe, and Auto-Save to Flash to quickly save shots.
- 16GB of RAM provides over 13 seconds of record time at 500 fps at full HD resolution of 1920 x 1080, and much more record time as smaller resolutions. 63 partitions allow for multiple shots.
- Passive cooled to mitigate vibration.

FLEXIBLE AND EQUIPPED WITH FULL PHANTOM FEATURES

- High image quality with low noise and high dynamic range to capture critical detail.
- Robust signaling with Programmable IO, including FSYNC, IRIG and STROBE and more increases the C321 Air's flexibility to meet specific workflows, timing and synchronization requirements.
- Increase frame rates by reducing resolutions. Test other critical phenomena with the same powerful camera.
